

ROCK DRILL

OILS

TruSouth Rock Drill Oils are special blends of highly refined base oils compounded with extreme pressure additives. TruSouth Rock Drill Oils have an unusually high film strength providing constant protection for metal surfaces against friction wear and heavy shock loads. The “tackiness” of these products also tends to reduce leakage thereby cutting lubrication costs.

TruSouth Rock Drill Oils are excellent lubricants for air-operated tools such as jack-hammers, pavement breakers, etc. They may be used in industrial machine shop applications including gear sets and can be used in both plain and anti-friction bearings. Their oxidation stability, extreme pressure characteristics, and high film strength all combine to provide excellent corrosion protection and shock load.

INDUSTRY SPECIFICATIONS:

- US Steel 224
- AGMA 9005-D94
- Cincinnati Milacron
- Clean Panel Coker
- S-200 Oxidation Tubes
